

湿度 (Humidity) data table for RSM upper layer, showing values for various grid points from 500 to 950 hPa over a period from 9/21 to 9/27.

天気 (Weather) and 降水量 (Precipitation) data table, including KI, 下層KI, SSI, 下層SSI, TOTL, and 雷達率 (Radar Rate) for the same period.

鉛直P速度 (Vertical P-velocity) data table in hPa/hr, showing values for grid points from 500 to 950 hPa.

相当温位 K (Equivalent Potential Temperature) data table, showing values for grid points from 500 to 950 hPa.

白字:対流不安定層 (White text: Convective instability layer) data table, showing values for grid points from 500 to 950 hPa.

露点 (Dew Point) data table, showing values for grid points from 500 to 950 hPa.
